38400R

Our Advantage™ 384-Well 1536-Well collection plates and accessories are designed for high throughput analysis and are available in an assortment of volume sizes and colors. The ability to color code allows you to quickly and easily identify the various stages of your samples whether they have been processed through protein precipitation, de-salting or dilutions.

Our polypropylene plates are chemical and solvent resistant and are fully compatible with automated and robotic systems.
